Subject: Re: Monument Review under Exec Order --- CSNM --- "Initial" Questions
Received: 2017-05-19T18:06:18-04:00

Thanks Kristi,

I hadn't heard any updates from WO until the calendar invite I just rec'd from Tim Fisher setting up a State NLCS Lead conf call for noon on Monday. One of the topics is a "Utah Template" for this data call, so I assume that will be the model we follow for what data to collect. I'll forward to you whatever I learn from that conf call soon after it ends. Then I suspect we can start in earnest.

Bill Kuntz, a Redding ORP, has reached out as the POC for the CA expansion area (in coordination w/ Mark Conley, the State Lead). I asked him to place any of the requested documents he has into the Drive folder (e.g., the pertinent RMP/ROD addressing that area). I'll need to ask WO if the "RMP/ROD" being requested is one specific to management of the Monument (which I have in our Drive folder), or if they want whatever is currently effective for the area. If the latter, we'll need to add the Western OR RMP addressing the OR expansion area.

Regarding your transmission line topic, I agree that only the "amount of energy transmission infrastructure on site" piece of the "Energy" questions is applicable to CSNM. So I believe your "miles and type (load) of line, facility name/# and owner" approach is logical.

If you come up with any additional questions before the noon Monday conf call, please forward them to me so that I can ask them on the call.

Thanks again for your advance efforts to meet this request. I'll be in touch early Monday afternoon.

Thank you Jerry. I have briefed Joel. We have a monument staff meeting tomorrow and we

will review, maybe catch the low hanging fruit and detail out any clarification questions we have. So for example on amount of energy transmission (since we don't have production) I am thinking miles of line, facility name/# and owner (PPL, etc).. So we'll review in detail and let you know what questions we may have.

Thank you,
Kristi

Hello Elizabeth and Kristi,

As time is winding down toward our June 2 deadline, I wanted to share the "initial questions" we've been tasked to answer (attached below). We've been asked to hold off jumping into the answers until we see what changes may arise as a result of the Bears Ears and GSENM experiences with meeting their earlier deadline this week. But I wanted you to see the scope of questions. It's basically giving annual output stats by specific use categories (a) under the Monument designation, (b) if the Monument didn't exist, and (c) in the 5 yrs preceding designation. Because of the recent expansion, we'll have to distinguish the 5 yr stats between the original Monument (1995 2000) and the Expansion (2012 2017). I'm thinking of separating them for the other questions as well, since there are major differences between them.

Kathy Stangl assigned me as lead to prepare our OR/WA response, and I set up a Google Drive site where I'm collecting requested documents and data sources for our response. I'll share that site with you under separate cover.

I've also asked my counterpart in CASO who we should work with to get the necessary data for the CA side.

Again, don't jump full force into response mode, as the questions/approach may change. But this gives you an idea of what we'll likely be looking for.

Please let me know if you have questions at this point. Please also let me know who else I should be communicating with on your staffs. I didn't include the usual folks on this email, as want your take on that.

Thanks, and I'm sorry this has been added to your (and all of our) workloads.

Subject: Fwd: Monument Review OR list of contacts

Tim,

Michael Campbell (mcampbel@blm.gov) and Jerry Magee (gmagee@blm.gov) will need access to the google drive folder to submit information for the review of the Cascade Siskiyou National Monument in Oregon.

State Directors:

National Conservation Lands received a data call to respond to Executive Order 13792 of April 26, 2017 (82 FR 20429, May 1, 2017) directing the Secretary of Interior to review certain National Monument designations or expansions under the Antiquities Act of 1906, 54 U.S.C. 320301-320303 (Act) (see attached).

The timeline for this data call is a short turnaround for all monuments, due by June 2, 2017, with the exception for both Grand Staircase Escalante National Monument and Bears Ears National Monument with an expedited due date of May 17, 2017. WO-410 needs assistance with this data call through the National Conservation Lands State Leads and from the affected Monument Managers, or the State Directors' designee, to gather up the desired information. Please review the attached word document for list of needed information and the list of National Monuments under review. We are expected to provide available data and information but not to create data or information or speculate on responses.

A Google Drive document folder is being established to easily transfer electronic files for each of the National Monuments under review. The desire is to limit access to assure consistent data collection. WO-410 is asking each of the States to provide names needing access for each National Monument and the lead from your state to oversee/coordinate this data call.

The two Utah National Monuments will help us to streamline the process and provide more specific guidance for the other National Monuments and the work load associated with this request. A follow-up email will provide more direction for all other BLM National Monuments under review later next week.

Please provide Timothy Fisher (tjfisher@blm.gov) a list of contacts for each monument who will need access to the google drive folder **by COB Tuesday May 16, 2017**.

The National Conservation Lands program appreciates your support in assisting with this important data call

Thank you!
Chris m
